

Setting up Connection Between HoloLens 2 and Python.

To connect to an unity application on the holoLens to python, I would use the TCPClient.cs file.

The file has a host IP address and a port specified.

To find the Host IP Address of your computer, open command line and type “ipconfig”

```
C:\Users\hatla>ipconfig
```

A list of different addresses will show up, the correct Address will be under an Ethernet adapter and is the Autoconfiguration IPv4 Address.

```
Ethernet adapter Ethernet 4:

Connection-specific DNS Suffix  . : 
Link-local IPv6 Address . . . . . : fe80::1455:649e:9125:c346%23
Autoconfiguration IPv4 Address. . : 169.254.79.201
Subnet Mask . . . . . : 255.255.0.0
Default Gateway . . . . . :
```
